SUBJECT:

I think it is desirable to have prepared for our first SCAG meeting a somewhat more detailed statement of SCAG's functions than was submitted to RDB. The reason for this is that we should avoid allowing SCAG to get into the position of doing a lot of back seat driving with regard to the general direction of effort.

in AFSA. I think it is important
to confine the group to specific
technical problems - at least
initially. Because of the presence
of a few old hands in the group
there may be a tendency to go
afield. What do you think?
